

University Admit Eligibility Predictor

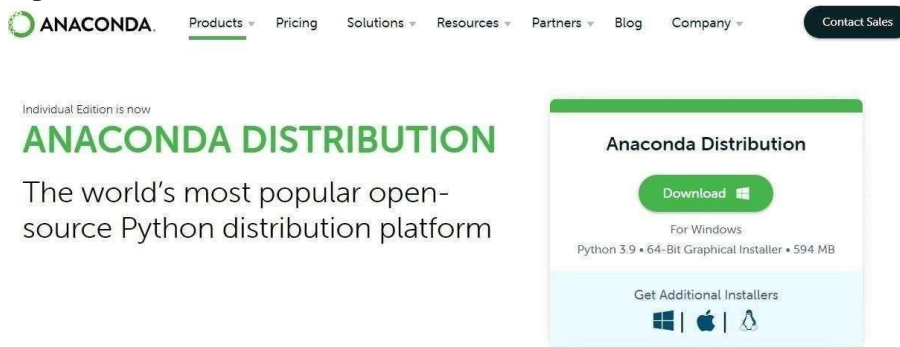

Project ID - PNT2022TMID23271

Introduction:

Anaconda is a distribution of the Python and R programming languages for scientific computing, that aims to simplify package management and deployment. The distribution includes data-science packages suitable for Windows, Linux, and macOS. It is developed and maintained by Anaconda, which was founded by Peter Wang and Travis Oliphant in 2012. As an Anaconda, it is also known as Anaconda Distribution or Anaconda Individual Edition, while other products from the company are Anaconda Team Edition and Anaconda Enterprise Edition, both of which are not free.

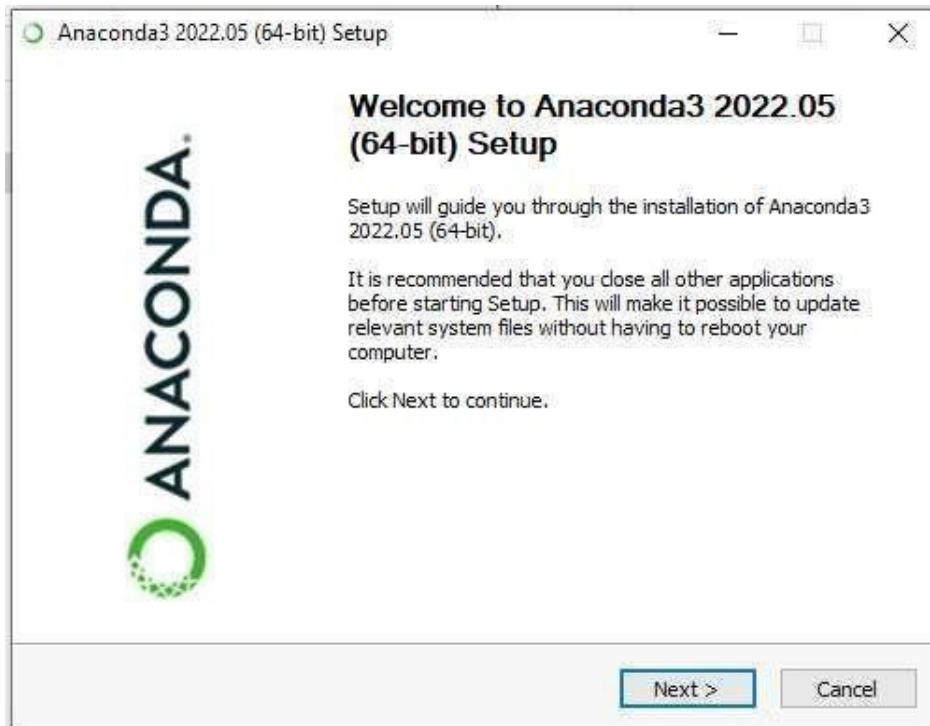

Installation Steps:

Step 1: Download and Anaconda

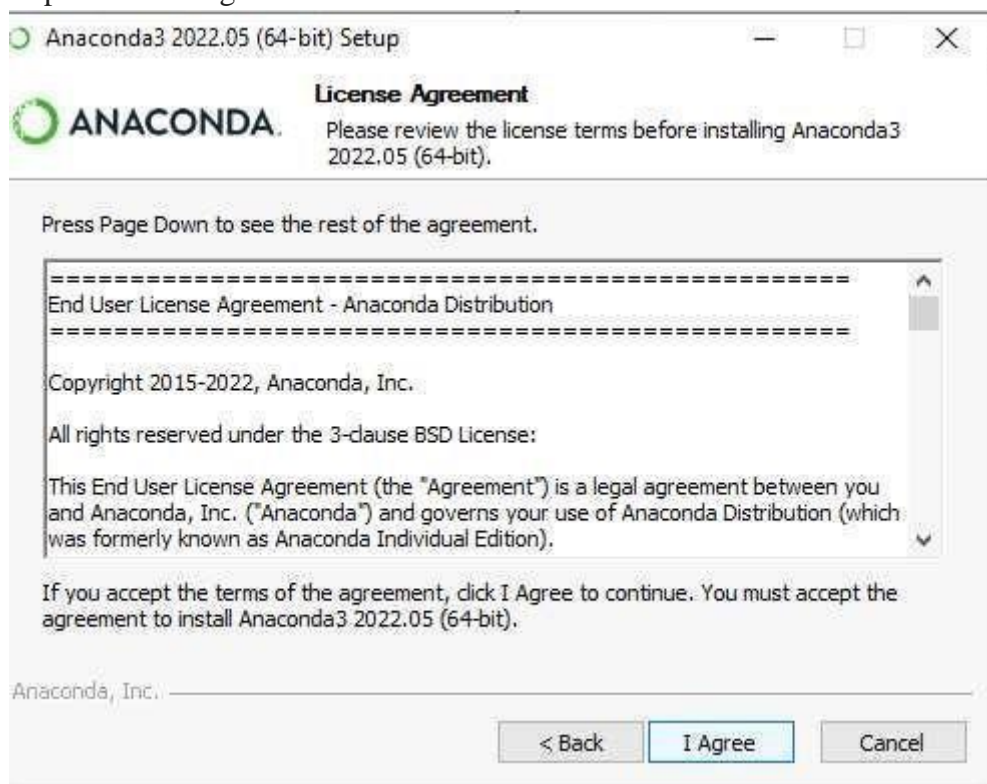

Step 2: Install the Anaconda
